Work Experience

Senior Shopify Developer

UMBRA DIGITAL-Parañaque City

October 2024 to Present

Responsibilities:

- Design, develop, and maintain custom Shopify Plus websites tailored to business needs.
- Customize Shopify themes and sections using Liquid, HTML, CSS, and JavaScript to deliver responsive and scalable storefronts.
- Collaborate closely with designers to translate Figma mockups into fully functional Shopify stores, ensuring a pixel-perfect implementation.
- Implement advanced e-commerce features, including dynamic product pages, custom checkout flows, and Shopify Plus Scripts for discounts and promotions.
- Utilize Shopify's GraphQL and REST APIs to optimize storefront data flow, build dynamic product experiences, and connect external services.
- Develop and maintain custom Shopify applications (private/public) to extend platform functionality.
- Architect headless commerce solutions using Shopify Storefront API, Next.js to build fast, interactive, and scalable storefronts.
- Leverage automation tools (n8n) and Shopify Flow to streamline operational workflows.
- Stay up to date with Shopify Plus features, industry trends, and e-commerce best practices to continuously improve the storefront experience.

Senior Fullstack Developer

JAV Resource Corporation-Olongapo

September 2024 to October 2024

As a Full-Stack Web Developer, I was responsible for both frontend and backend development. Leveraging modern frameworks and content management systems, I contributed to creating user-centric and scalable digital solutions.

Key Responsibilities:

- Built dynamic and responsive user interfaces using React and Next.js.
- Developed and maintained backend systems using Strapi CMS, enabling efficient content management and API creation.
- Worked closely with cross-functional teams to define requirements and deliver tailored solutions.
- Troubleshoot and resolved issues efficiently across the tech stack, ensuring a smooth user experience

Fullstack Web Developer

Hokei Subic Corporation-Olongapo

April 2022 to August 2024

Frontend Development:

- Implementing APIs (REST/GraphQL) in web applications
- Designing and developing user interfaces
- Managing state using Redux Toolkit
- Collaborating with designers to create seamless user experiences
- Implementing secure authentication using AuthJS
- Ensuring cross-browser compatibility and responsiveness for various devices

Backend Development:

- Designing and developing database models and schema's
- Building and maintaining robust and scalable server-side applications

- Integrating third-party services and APIs
- Ensuring data integrity and security in backend processes
- Writing efficient and maintainable code to optimize performance

Education

Computer Science (Bachelor's)

President Ramon Magsaysay State University-Iba, Zambales

June 2017 to August 2021

Skills

- Git (5 years)
